

JPX Jet Projector® Gun– TJA Instructor Certification Course

COURSE LOCATION: Scheduling Nationwide

COURSE DATES: TBD

COURSE PROFILE: The design of the JPX is based on a firearm. The receiver is a self-contained unit consisting of an ergonomic pistol grip, trigger, ambidextrous two-shot cartridge release lever, self-cycling double action only firing mechanism, Picatinny rail for flashlights, camera, and laser sight with laser activation switch. Also, a self-contained unit, the two-shot cartridge consists of two 14x109 mm self-sealing cartridges, two individual nozzles and open sights. The two-shot cartridge is disposable. The JPX Jet Protector Gun is a new, two shot OC delivery system designed to provide a laser targeted, distance (out to twenty-three feet) weapon system. The rounds deliver up to 550 fps amount of .39ml (less than a thimble amount of OC) to its target with incredible accuracy even in wind conditions. Note: The JPX **IS NOT** considered a firearm as per B.A.T.F.

The JPX is available in black or orange in alternating colored barrels. The twin barrel system can be changed out in three seconds and can deliver two rapid shots to the subject. Includes a low-ride leg system with the course. **The instructor training program is a one-day eight-hour certification course.**

TOPICS COVERED IN THE COURSE INCLUDES:

- Complete terminologies; nomenclature; mechanics and proper and legal use & applications of the JPX Jet Projector® Gun.
- Complete review of OC aerosol including updated decontamination methods; use of OC as per Federal guidelines in the TJA Ladder of force Continuum with totality of circumstances documentation priorities.
- Complete safety issues & protocols when employing the JPX Jet Projector® Gun.
- Hands-on training including drills and scenarios will be conducted as well as an inert exposure with a training cartridge.
- Certification procedures and five-year backed in court TJA certification.

COURSE TUITION: CONTACT US
